Collected surveys from 380 people;
Held 3 focus groups with 21 participants total

PARTNER AGENCIES ON OUR STEERING COMMITTEE

State of New Mexico
Governor's Commission on Disability

New Mexico DEPARTMENT OF
TRANSPORTATION
MOBILITY FOR EVERYONE

What we heard from the community:

Door-to-door service

Non-emergency medical transport

Affordable transportation

Want to be healthier

Better sidewalks

Safer bike routes

Lessons learned

- ▶ Some people can use existing transit options, but don't know how to navigate transit systems
- ▶ Other people need transportation services that aren't available from current transit options, such as door-to-door service, longer travel
- ▶ Social isolation isn't unusual for people in rural communities, but they would still appreciate and benefit from more social connections

IMPLEMENTATION PROPOSAL

- Volunteer Driver Program
 - Fill gaps between existing transit options
 - Connect rural communities and individuals with city-center services
- Technical and transit training
 - Help seniors and disabled adults use technology to connect, and to access transit options
 - Work with transit providers to bring hands-on experience using current transit options
- Create transit hub website + brochures
